

## Andrew Flick

**High School:** Kettle Moraine High School

**SMART Team Project:** It's Positive to be Negative: Electron Transfer and Cytochrome P450 Cam **Mentor:** Daniel Sem, Ph.D., Marquette University, Milwaukee, WI

**College:** Minnesota State University, Mankato, MN

**Major:** Zoology Animal Research

**Impact of SMART Teams:** SMART team impacted me in several ways. First of all, it helped me fill in college applications and get ahead of other college bound students. Second of all it helped me figure out what I wanted to major in. Had I not been on SMART team, I would not have chosen a biology major. Third of all, I met new people that I would never have met outside of SMART team. I even still come back to see current SMART team presentations.

**Favorite Memory:** My favorite memory of SMART team was playing with the magnetic water molecules we got during the initiation meetings, making ice crystals is a good time.
