2009-2010 SMART Teams
Presentation Phase

Task #1 – Summary of Projects

Due: 8 January 2010

Prepare a 1-2 minute summary of your project. You will be sharing this summary with other SMART Teams at the Jan 9th meeting.

This summary should be a brief overview of your project. Why is it interesting? What protein are you modeling? What does this protein do in connection with the big picture?

In order to help you prepare for this brief overview, please submit a short summary to Shannon by Friday, Jan 9th. This essentially would be what you will say on Saturday when you discuss your project with the other teams.
